

Women's Health

Women's health services include annual exams, contraceptive counseling, emergency contraception, pregnancy testing, sexually transmitted disease (STD) testing, and other gynecological concerns. Scheduled appointments are required.

There is a fee for these services. **Women's health visits that are not canceled or rescheduled at least 2 hours in advance will be charged \$25.**

2016 Pap Smear Recommendations

- **Women should have their first screening Pap Smear at age 21**
- **Women in their 20's** should have a Pap smear every three years (assuming Pap smears have been normal)
- **Women age 30 and older** should have a pap every 3 years or pap with HPV test every 5 years
- **Women who have had a hysterectomy for non-cancerous reasons** do not need a Pap smear unless they have a cervix
- **These guidelines need to be followed whether you have or have not had the HPV vaccine**

The Student Health Services recommend:

- **We still recommend a yearly physical** including a breast exam, STI screening if indicated, and/or a pelvic exam* based on the discretion of your medical provider.
- **You must have an annual exam to receive birth control**, which may or may not include a pelvic exam/pap smear.
- **If you have ever had an abnormal Pap Smear**, consult with a Physician concerning how often you will need a Pap smear.
 - The pelvic exam may or may not include a Pap smear based upon your history and the ACOG guidelines. Your physician will discuss this with you at the time of your appointment.

If you have any further questions or would like to make an appointment, please call Health Services at 620-235-4452, or use our online scheduling at: <http://www.pittstate.edu/office/health/>

Men's Health

The Health Center provides confidential service designed to meet the special needs of men including their sexual and genitourinary health concerns. Students may be seen by appointment or on a walk-in basis.
